Born on October 9, 1993 in Piacenza, Italy.
Nationality: Italian.

Current position

Post-doctoral researcher, KTH.

Areas of specialization

Numerical mathematics for partial differential equations, approximation theory, model order reduction, frequency-domain applications, scattering problems.

Appointments held

- 2014–2017 [*Special courses teacher*, Piacenza (IT).
- 2016 [*Developer intern*, Iren SpA, Piacenza (IT).
- 2017–2021 [*Doctoral assistant*, EPFL, Lausanne (CH).
- 2022 [*Post-doctoral researcher*, EPFL, Lausanne (CH).
- 2022–2024 [*University assistant and post-doctoral researcher*, University of Vienna, Vienna (AT).
- 2024–now [*Post-doctoral researcher*, KTH, Stockholm (SE).

Education

- 2012–2015 [BSc in Applied Mathematics (*cum laude*), Politecnico di Milano, Milan (IT).
Thesis: “A mathematical justification of the momentum operator in quantum mechanics”.
Advisor: Prof. M. Verri.
- 2015–2017 [MSc in Computational Science and Engineering, EPFL, Lausanne (CH).
Project: “Implementation of smooth contact mechanics with the mortar method”.
Advisor: Prof. G. Anciaux.
Project: “Finite elements-based Padé approximants for Helmholtz frequency response problems”.
Advisor: Prof. F. Nobile.
Thesis: “Randomized low-rank approximation of matrices and tensors”.
Advisor: Prof. D. Kressner.

- 2017–2021 [PhD in Mathematics, EPFL, Lausanne (CH).
Thesis: “Model order reduction based on functional rational approximants for parametric PDEs with meromorphic structure”.
Advisor: Prof. F. Nobile.

Grants, honors, and awards

- 2011 [3rd place at the “Hong Kong International Science Fair”.
2013 [4th place in the “Championnat International des Jeux Mathématiques et Logiques”.
2014 [5th place in the “Championnat International des Jeux Mathématiques et Logiques”.
2017 [Douchet prize for best GPA, MATH-EPFL.
2020 [Prize for exceptional teaching service, Section of Mathematics, EPFL.
2021 [Junior Research Fellowship at ESI Vienna.
2025 [NAISS small compute grant for study of U-Kolmogorov Arnold networks.

Publications

Journal articles

- 2019 [F. Bonizzoni and DP, “Distributed sampling for rational approximation of the acoustic scattering of an airfoil”, PAMM 19.
2020 [F. Bonizzoni, F. Nobile, I. Perugia, and DP, “Fast Least-Squares Padé approximation of problems with normal operators and meromorphic structure”, Math. Comput. 89.
F. Bonizzoni, F. Nobile, I. Perugia, and DP, “Least-Squares Padé approximation of parametric and stochastic Helmholtz maps”, Adv. Comput. Math. 46.
[DP, “Interpolatory minimal rational model order reduction of parametric problems lacking uniform inf-sup stability”, SIAM J. Numer. Anal. 58.
2021 [F. Bonizzoni and DP, “Shape optimization for a noise reduction problem by non-intrusive parametric reduced modeling”, Proc. WCCM-ECCOMAS2020.
DP and F. Nobile, “Frequency-domain non-intrusive greedy Model Order Reduction based on minimal rational approximation”, Sci. Comput. Electr. Eng. 36.
[F. Nobile and DP, “Non-intrusive double-greedy parametric model reduction by interpolation of frequency-domain rational surrogates”, ESAIM:M2AN 55.

Pending articles

- 2024 [DP, I. V. Gosea, and J. Heiland, “Barycentric rational approximation for learning the index of a dynamical system from limited data”, under review.
- 2025 [DP, R. Hiptmair, and I. Perugia, “Surrogate modeling of resonant behavior in scattering problems through adaptive rational approximation and sketching”, under review.

Talks and attendance at events

Presentations at conferences

- 2019 [DP, F. Nobile, F. Bonizzoni, and I. Perugia, “A technique for rational model order reduction of parametric problems lacking uniform inf-sup stability”, GAMM Annual Meeting 2019, Vienna (AT).
- DP, F. Nobile, F. Bonizzoni, and I. Perugia, “A technique for rational model order reduction of parametric problems lacking uniform inf-sup stability”, ICIAM 2019, Valencia (ES).
- [DP and F. Nobile, “Interpolatory rational model order reduction of parametric problems lacking uniform inf-sup stability”, ENUMATH 2019, Egmond aan Zee (NL).
- 2021 [DP, F. Nobile, and F. Bonizzoni, “Non-intrusive model reduction of parametric frequency response problems via minimal rational interpolation”, ICOSAHOM 2020/2021 (virtual), Vienna (AT).
- [DP and F. Nobile, “Non-intrusive model reduction of parametric frequency-response problems – with applications to UQ”, SIMAI 2020+2021, Parma (IT).
- 2022 [DP and F. Nobile, “Non-intrusive surrogate modeling of parametric frequency response problems – With applications in forward UQ”, SIAM UQ22 (virtual), Atlanta (Georgia, US).
- DP and F. Nobile, “Inexpensive surrogate modeling of frequency response problems by greedy minimal rational interpolation”, GAMM Annual Meeting 2022, Aachen (DE).
- [DP and F. Nobile, “Non-intrusive surrogate modeling of frequency response surfaces via locally adaptive sparse grids”, GIMC SIMAI Young 2022, Pavia (IT).
- 2023 [DP, M. Nonino, and I. Perugia, “Geometry-based approximation of waves propagating through complex domains”, 17th Austrian Numerical Analysis Day, Vienna (AT).
- DP, F. Nobile, and A. Borghi, “Non-intrusive surrogate modeling of parametric frequency-response problems”, Math2Product 2023, Taormina (IT).
- DP, “Rational approximation with minimal sampling for Helmholtz-like problems”, ILAS 2023, Madrid (ES).
- [DP, F. Nobile, and A. Borghi, “Data-driven adaptive approximation of parametric dynamical systems with pole bifurcations”, ENUMATH 2023, Lisbon (PT).
- 2024 [DP, F. Nobile, and A. Borghi, “Adaptive collocation-based approximation of parametric nonlinear eigenproblems”, SIAM UQ24, Trieste (IT).
- [DP and A. Borghi, “Adaptive collocation-based approximation of parametric nonlinear eigenproblems”, ECM 2024, Seville (ES).
- 2025 [DP, A. Borghi, A. Kleefeld, and L. Pieronek, “Approximation of parametric eigenvalues – with applications to interior transmission eigenvalue problems”, NACONF 25, Glasgow (UK).

Posters

- 2018 [F. Bonizzoni, I. Perugia, F. Nobile, and DP, “An efficient algorithm for Padé-type approximation of the frequency response for the Helmholtz problem”, MoRePaS IV, Nantes (FR).

- [F. Bonizzoni, I. Perugia, F. Nobile, and DP, “An efficient algorithm for Padé-type approximation of the frequency response for the Helmholtz problem”, Swiss Numerics Day 2018, Zurich (CH).
- 2020 [DP and F. Nobile, “Frequency-domain non-intrusive greedy Model Order Reduction based on minimal rational approximation”, SCEE 2020, Eindhoven (NL).
- [DP and F. Nobile, “Frequency-domain non-intrusive greedy Model Order Reduction based on minimal rational approximation”, MORSS 2020 (virtual), Lausanne (CH).
- 2022 [DP and F. Nobile, “Non-intrusive adaptive surrogate modeling of parametric frequency-response problems”, MORE 2022, Berlin (DE).

Other talks and seminars

- 2018 [DP, F. Nobile, F. Bonizzoni, and I. Perugia, “Fast Least-Squares Padé approximation of self-adjoint problems with meromorphic structure”, seminar, MATHICSE retreat, Sainte-Croix (CH).
- [DP, F. Nobile, F. Bonizzoni, and I. Perugia, “Fast Least-Squares Padé approximation of self-adjoint problems with meromorphic structure”, workshop talk, DRWA, Alba di Canazei (IT).
- 2019 [DP and F. Nobile, “Polynomial approximation of resonance manifolds”, short seminar, MATH-ICSE retreat, Champéry (CH).
- 2020 [DP, “Padé approximation: a quick overview”, seminar (virtual), CSQI talks, Lausanne (CH).
- [DP, “From Padé approximation to rational interpolation”, seminar (virtual), CSQI talks, Lausanne (CH).
- [DP, “Minimal rational approximation”, seminar (virtual), CSQI talks, Lausanne (CH).
- [DP, “Minimal rational approximation: a model reduction tool for parametrized PDEs with resonances”, seminar (virtual), PDE afternoons, Vienna (AT).
- 2021 [DP, “Matching-based pMOR for dynamical systems”, seminar (virtual), CSQI talks, Lausanne (CH).
- 2022 [DP, “Surrogate modeling of parametric frequency response problems via locally adaptive sparse grids”, workshop talk, “Approximation of high-dimensional parametric PDEs in forward UQ” ESI workshop, Vienna (AT).
- [DP, “Can reliable surrogate models for frequency-domain problems be both non-intrusive and cheap to build?”, workshop talk, “UQ in kinetic and transport equations and in high-frequency wave propagation” ESI workshop, Vienna (AT).
- 2023 [DP, “Efficient and adaptive rational approximation for parametric dynamical systems”, seminar, CSC seminar, Magdeburg (DE).
- 2024 [DP, “Adaptive data-driven surrogate modeling of parametric nonlinear eigenproblems”, seminar, NA seminar, KTH, Stockholm (SE).
- 2025 [DP, “Numerical methods for surrogate modeling”, short seminar, SFG division meeting, KTH, Stockholm (SE).

Attended events

- 2018 [“Numerical Analysis of Complex PDE Models in the Sciences” ESI workshop, Vienna (AT).
- 2021 [Swiss Numerics Day 2021, Lausanne (CH).
- 2022 [“Adaptivity, High Dimensionality and Randomness” ESI workshop, Vienna (AT).
- [Austrian Numerical Analysis Day 2022, Linz (AT).
- [MCQMC 2022, Linz (AT).

- 2023 [“Canonical scattering problems” INI workshop, Cambridge (GB).
 [2nd SFB International Workshop 2023, Vienna (AT).
- 2024 [“Celebrating Zhaojun Bai’s honorary doctorate” workshop, Stockholm (SE).
 [5th Workshop on Scientific Computing in Sweden, Stockholm (SE).

Teaching experience

- 2017–2021 [As teaching assistant at EPFL (preparation of course and exercise material, preparation and grading of assignments and exams):
 - 2017 (Analyse avancée I, BSc in Mathematics.
 - 2018 (Analyse numérique, BSc in Mechanical Engineering.
 - 2018 (Analyse fonctionnelle, BSc in Mathematics.
 - 2019 (Introduction to partial differential equations, BSc in Mathematics.
 - 2021 (Numerical analysis and computational mathematics, MSc in Computational Sciences and Engineering.
- 2019–2021 (Parallel and high-performance computing, MSc in Computational Sciences and Engineering.
- 2022 [Invited lecturer for: Numerical methods for random PDEs and uncertainty, PhD course, EPFL.
- 2022–2023 [As university assistant at U Vienna (charged with the organization of the whole course):
 - 2022–2023 (Exercises of Analysis and Linear Algebra I, BSc in Mathematics.
 - 2023 (Topics in Finite Elements, MSc in Mathematics.
 - 2023 (Exercises of Applied Mathematics, BSc Teacher Training Program in Mathematics.
 - 2023 (Exercises of Numerical Mathematics, BSc in Mathematics.
- 2024–2025 [As postdoc at KTH (co-responsible of the whole course):
 - 2025 (Numerical Methods for Differential Equations II, MSc in Mathematics.

Teaching education

- 2023 [“When to Teach What? - Sequencing Course Content and Assignments”, Center for Teaching and Learning, University of Vienna.
 [“(Unconscious) Bias at the University”, Center for Training and Development, University of Vienna.
 [“Introduction to Active Learning”, Center for Teaching and Learning, University of Vienna.

Other service

- 2019 [Supervision of BSc thesis: “Approximation numérique du spectre des opérateurs elliptiques d’ordre deux” by T. Chanay, EPFL.
- 2020 [Organizer of the Model Order Reduction Summer School 2020 (virtual event).
 [Referee for scientific journals: “Advances in Computational Mathematics”.
- 2022 [Supervision of MSc project: “Minimal rational approximation for time-harmonic Maxwell’s equations” by F. Matti, EPFL.
 [Referee for scientific journals: “Journal of Computational Physics”.
- 2023 [Chairperson for “Data-driven reduced order modelling and surrogates with applications in complex multi-physics systems” mini-symposium at M2P 2023.

- Organizer of the “Reducing the irreducible: model reduction for transport-dominated problems” mini-symposium at ENUMATH 2023.
- [Referee for scientific journals: “Advances in Computational Mathematics”, “Computational Methods in Applied Mathematics”, “Journal of Computational Physics”, “Inverse Problems”, and “SIAM Journal of Scientific Computing”.
- 2024 [Organizer of the “Methods for stochastic/parametric frequency-domain and spectral problems” mini-symposium at SIAM UQ24.
- [Referee for scientific journals: “Advances in Computational Mathematics”, “Applied Mathematics Letters”, “Computational Methods in Applied Mathematics”, “IEEE Transactions on Microwave Theory and Techniques”, and “Mathematics and Computers in Simulation”.
- 2025 [Supervision of MSc thesis: “Kolmogorov Arnold Networks for differential applications within atmospheric modelling” by S. Vogel Hauger, KTH.
- Organizer of the “Career development activities for PhDs and postdocs in Math” series at KTH.
- [Referee for scientific journals: “Journal of Computational Physics”, “Journal of Scientific Computing”, and “23rd European Control Conference”.
- 2024–now [Editorial board member of “Examples and Counterexamples”.
- [Chair of the Numerical Analysis seminar series at KTH&SU.

Computer skills

- Advanced [MATLAB, C/C++, OpenMP, MPI, Python, L^AT_EX.
- Intermediate [CUDA, C#, FreeFem++, HTML, CSS.
- Basic [R, OpenFOAM, Fluent, Fortran, Java.
